TRADITIONAL WOOD SHUTTERS MEET TECHNOLOGY

Shutter smart

POLYCLAD HARDWOOD SHUTTERS

ShutterSmart Polyclad wood shutters are designed to deliver the elegance, look and feel of traditional wood shutters but without any of the maintenance challenges of wood.

The Polyclad Woodtex surface gives the soft feel and look of wood but is easy to clean and guaranteed against fading, warping, cracking and peeling. The solid wood construction delivers the strength of a wood shutter allowing for wide, tall and strong panels that won't come apart over time.

The Polyclad wood construction is low maintenance and a great value, making ShutterSmart the most intelligent choice in shutters today.

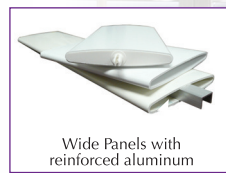

All of our shutters are custom made to your specification in North America.

Strong hardwood construction
just like a wood shutter

Low Maintenance
polyclad surface

Thermocore louvers with superior
insulation and wide 36" panels

Shuttersmart Polyclad
